Convert PDFs and Images to Forms
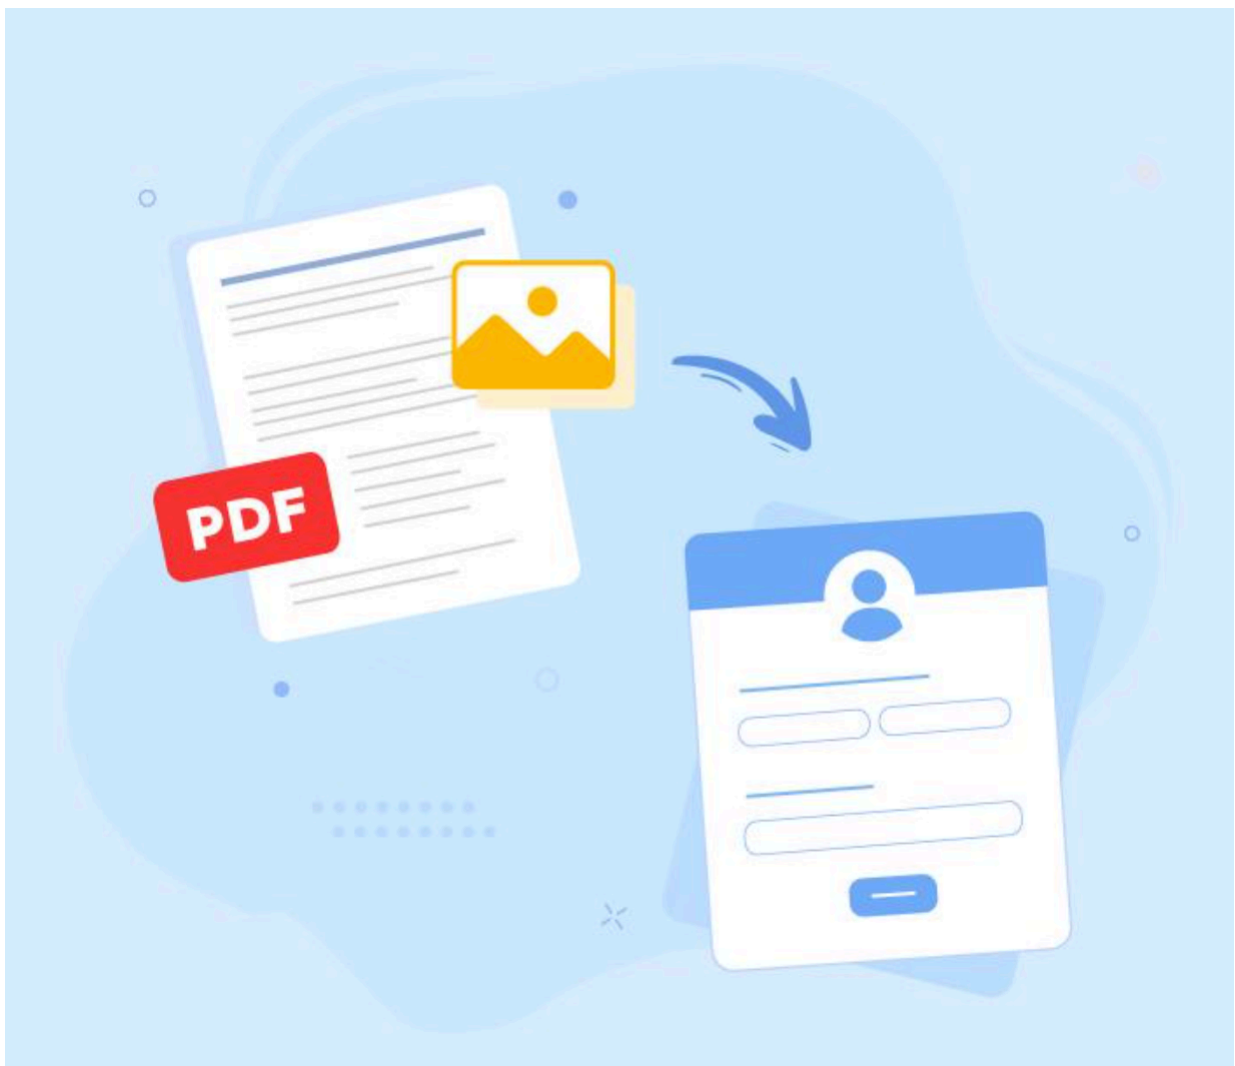

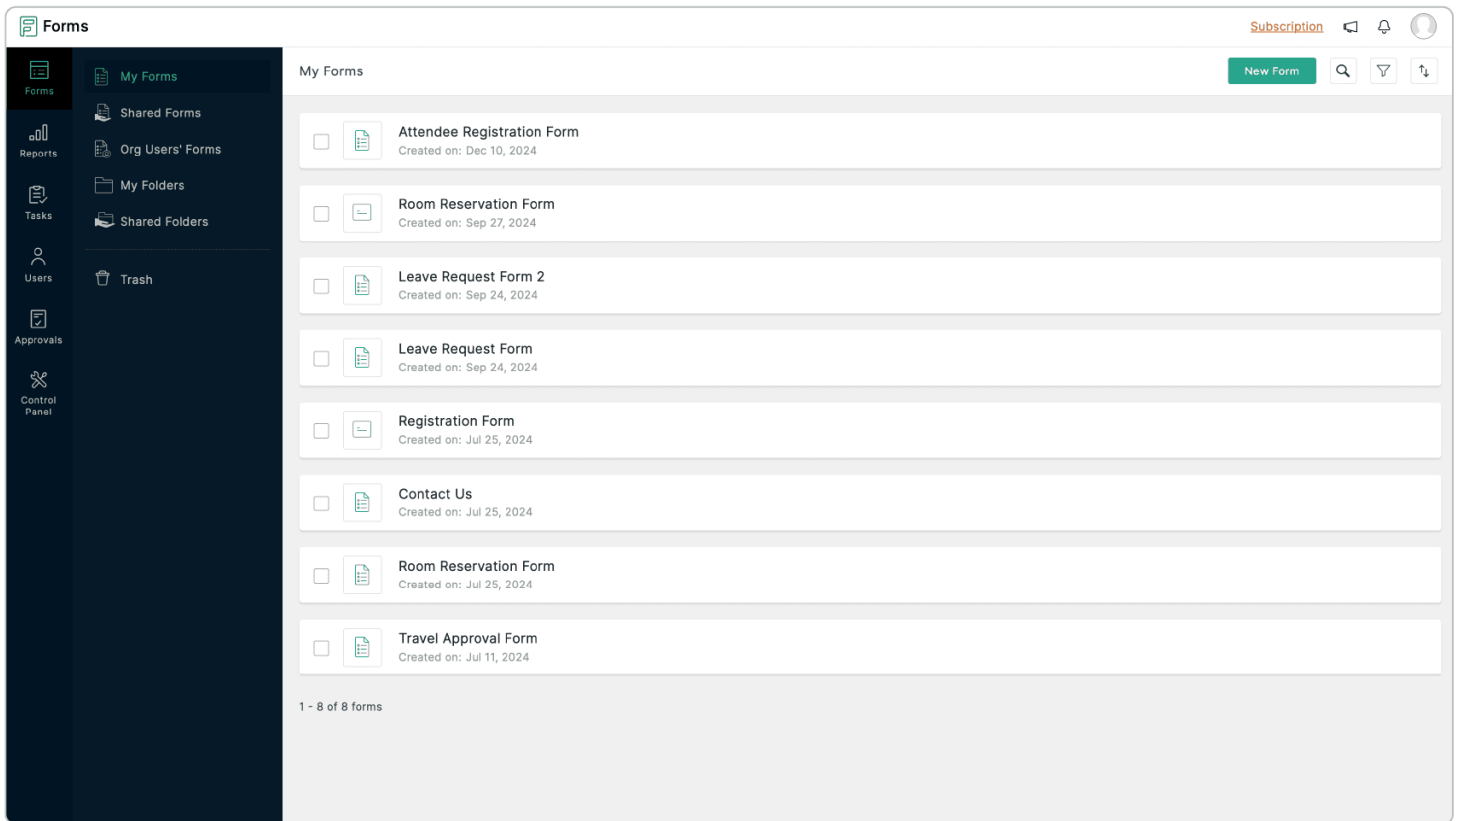

The **Convert PDF to Form** feature lets you easily transform documents like PDFs, images (JPG, JPEG,PNG) into online forms. Whether it's a scanned paper form, a fillable PDF or an online document screenshot, simply drag and drop or upload your file to generate an interactive form instantly. This saves time by converting existing resources into customizable forms, allowing you to edit fields, adjust themes, and deliver a seamless experience for your respondents.

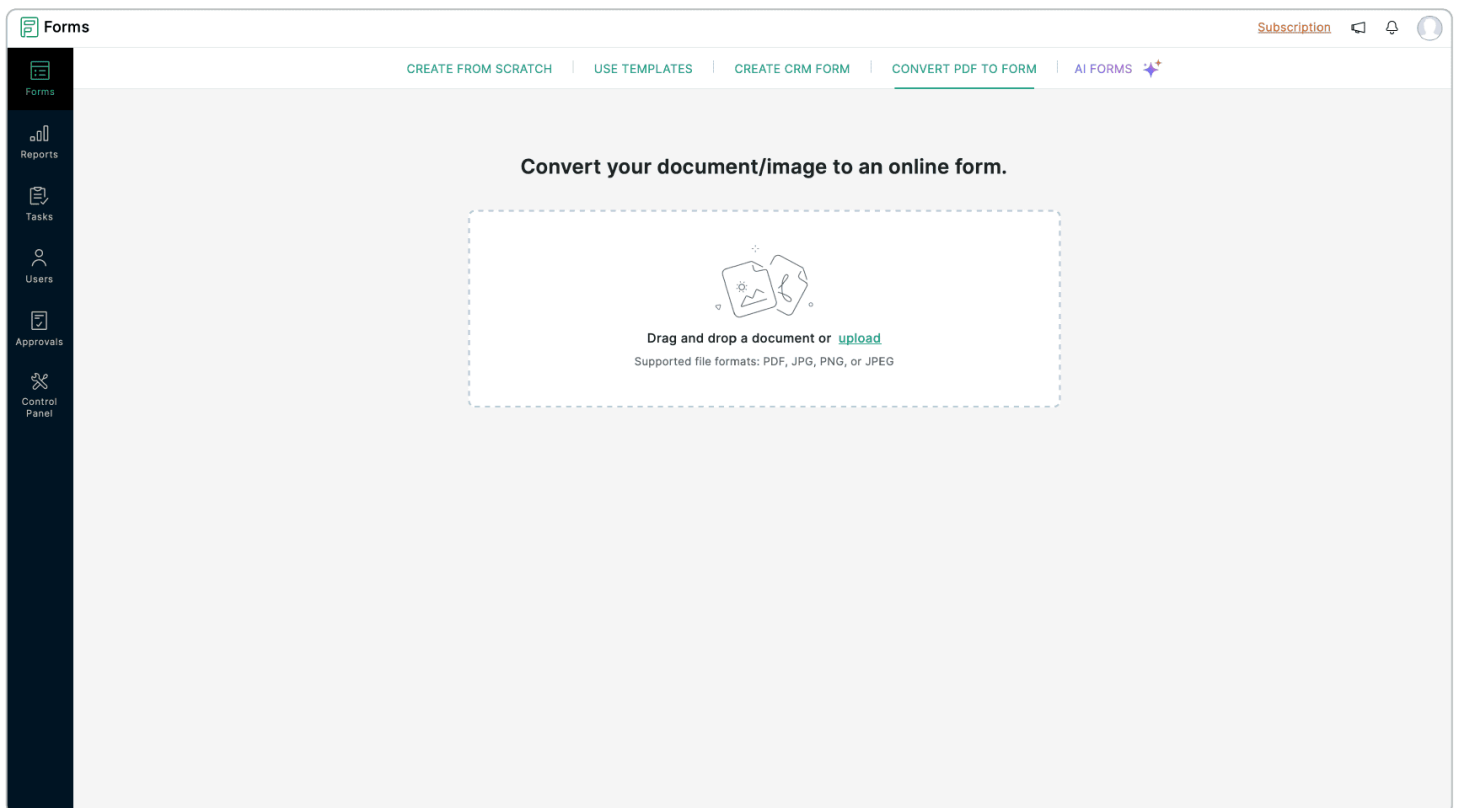

To convert a document into an online form,

1. Click **New Form** in the top-right corner of your forms listing page.
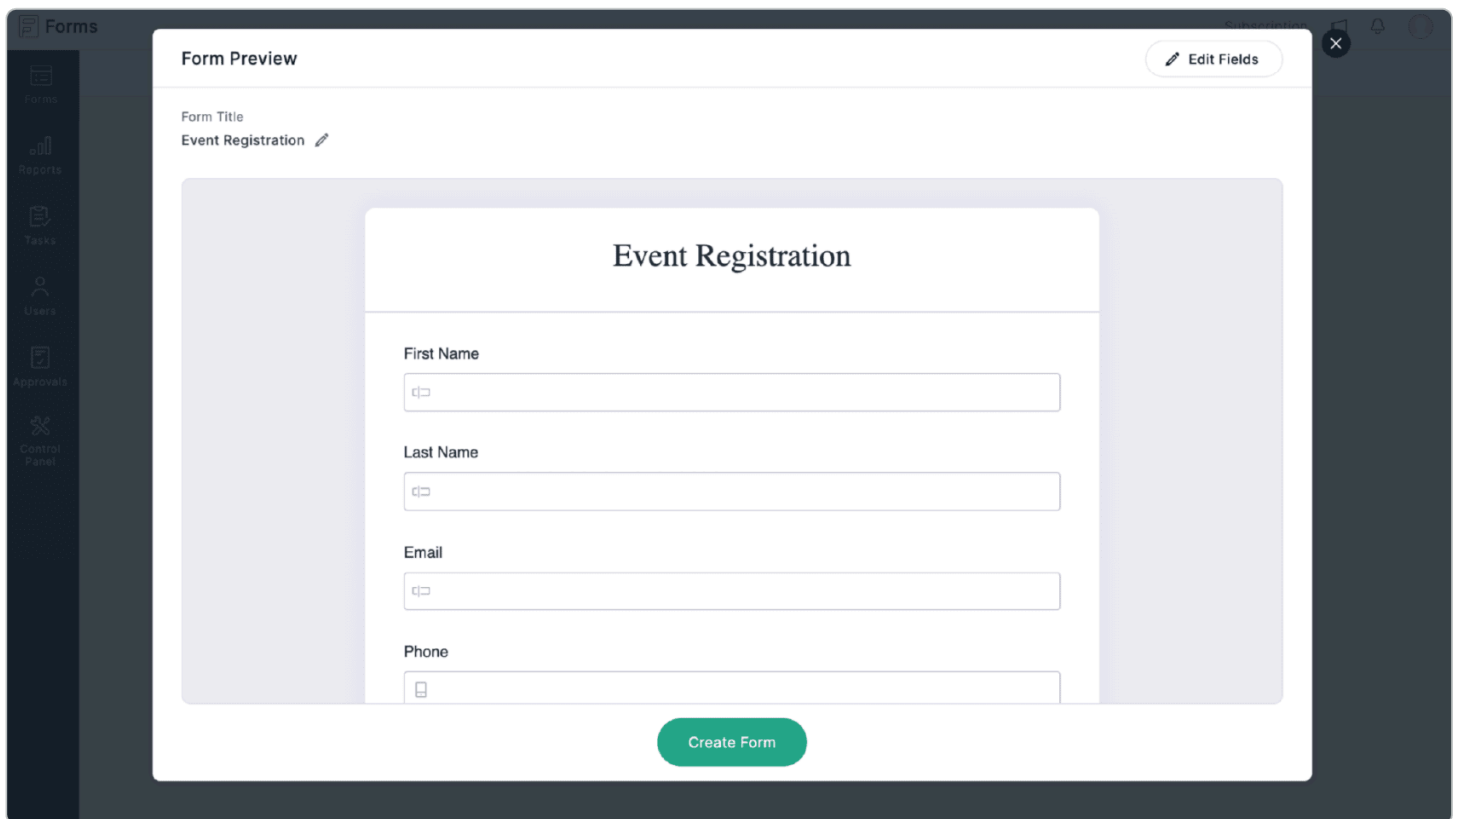

2. Select **CONVERT PDF TO FORM** to proceed.

3. Drag and drop a document or upload one. Supported formats are PDF, JPG, JPEG, and PNG.

4. Click **Convert to Form** to generate an online form from the document provided.

5. Validate the form preview, make changes using the **Edit Fields** option if needed, and click **Create Form** to finalize the online form.

6. In the form builder, you can modify, add, or delete fields, and change the theme to suit your requirements.
