

Currency

Total Payment Amount

 USD

The **Currency** field captures monetary values in a specific currency along with its unit. This could be a monetary value associated with a transaction, donation, or any other financial information.

- **Placeholder Text:** Provide a placeholder text for each name element in a form to enhance user guidance and set expectations for respondents. Placeholder text serves as a temporary example or hint within the form fields.
- Select a **Unit** for the currency and choose if you wish to display the unit as a code or a symbol.
- **Thousand Separator:** Automatically include a symbol (such as a comma or period) to separate groups of thousands when users input large numbers of currency.
- **Rounded to:** The Currency field allows decimal values. You can set the number of decimal places allowed to ensure consistency and precision in the collected data.
- **Initial Value:** You can set the default currency amount to prefilled when the user accesses your form.
- **Range:** The field can be configured with a defined range of acceptable values. This involves setting minimum and maximum digits/values to constrain the allowable input.

Validation

- **Mandatory:** Ensure that respondents cannot submit the form without entering data in this field.
- **No Duplicates:** Prevent the submission of identical entries.
- **Allow Negative Value:** Allow respondents to input numeric values that fall below zero.
- **Include currency input confirmation:** Selecting this option prompts the respondents to re-enter the currency values for confirmation, ensuring that both inputs match, thus preventing typos.
