

Multi Line

A screenshot of a form field titled "Write your Product experience". The field contains the text: "The product quality is good. In love with the color. Fits me best!". The field has a light gray border and a small icon in the bottom right corner.

The **Multi Line field** is a form field to capture responses that require more extensive input than a single line allows. It's particularly useful when you need respondents to provide detailed or elaborative information. For example, in a Review form for an event or a product, you can let respondents to share their overall experience or provide any additional comments over your service.

In the **Properties** of the field, several customizable features enhance its functionality and user experience:

Placeholder Text

You have the option to provide placeholder text, offering a brief hint or example to guide respondents on the expected input. This aids clarity and encourages accurate responses.

Character Limit

The field can be configured with a specified character or word limit, ensuring that responses remain within a defined range.

Range: 0 - 65535 characters/ 0 - 5000 words

Initial Value

Provide the initial value to be displayed when the form loads. This allows you to prefill the field with default content, streamlining the data entry process for respondents.

Validation

- **Mandatory:** Ensure that respondents cannot submit the form without entering the data in this field.

Input Text Case

You have the flexibility to control the visual presentation of the entered text, aligning it with the intended formatting standards for your form.

- System Default
- Upper Case
- Lower Case
- Proper Case
