Website

Product URL

http://casual-shirt/134

The **Website** field in a form is designed to capture and validate website addresses (URLs) provided by users. Users can input a website address, commonly known as a URL (Uniform Resource Locator), into the website field.

- **Placeholder Text:** Provide a placeholder text for each name element in a form to enhance user guidance and set expectations for respondents. Placeholder text serves as a temporary example or hint within the form fields.
- **Initial Value**: You can set the default website URL that is automatically prefilled when a user accesses the form.

Validation

- **Mandatory**: Ensure that respondents cannot submit the form without entering a URL in the **Website** field.
